

BIOMETRICS FOR SECURITY. INTEGRATION FOR CONVENIENCE.

K4000

Keyboard W/
Fingerprint
Reader

PERFECT FOR THE SPACE SENSITIVE.

The K4000 offers a full-sized ergonomic USB keyboard integrated with the security and convenience of an industry leading fingerprint reader. Leaning upon the proven and reliable P4000 platform this keyboard is intended for the rigors and demands of the business world.

Utilizing AuthenTec's AES4000 sensor, the most successful fingerprint technology in the market, the K4000 offers superior performance and image quality.

Incorporating '*RUN!*' a Proprietary performance enhancing technique this unit achieves unmatched uptime and trouble free operation.

KEY FEATURES

High Security

The most secure sensor technology available. Numerous built-in antispoofing measures.

High Performance

Unequaled "Ability to Acquire". Capitalizing upon the AuthenTec 'True Print' technology, difficult fingers are a thing of the past. Industry's best FAR/FRR.

Premium Reliability and Safety

Utilizing '*RUN!*' this unit achieves unparalleled maintenance free operation. '*RUN!*' is a proprietary Hardware/Software Design that optimizes Error Handling, ESD Detection, and Safety Management.

Superior Image Quality

E-Field approach results in a high-quality image that creates reliable authentication. These images ensure we capture everyone, everytime under virtually all conditions.

Full-Sized Keyboard With USB Hub

104 Key Full-Sized Executive style keyboard with ergonomic design and soft-pressure key stroke. USB powered hub with an available port.

K4000

Keyboard W/ Fingerprint Reader

FEATURES

Sensor	AuthenTec AES4000 EntrePad with 'True Print' technology. 250dpi image density. High-rate USB frame capture.
'RUN!' ERROR HANDLING	A Proactive Error Handling Layer that is transparent to the end user and practically eliminates calls for technical support. This, microprocessor based system, automatically detects and corrects PC/USB instabilities.
Thermal Protection	Continuous Power Monitoring and the use of a resettable fuse provide a two step thermal protection, guaranteeing safe operation under all conditions.
ESD Suppression	A Multi-point suppression strategy ensures the quickest and most complete reaction to ESD overvoltage events, maximizing up-time and preventing damage.
Size and Weight	68" (L) X 185" (W) X 70" (H). 2 lbs.
Communication	USB, with an available USB Port.
Cable	A 5.5 ft. USB cable.

CUSTOMIZATION

- Custom Logo Marking:
Your own Logo including graphics and text can be Lasered on the Keyboard. (upon request)

SDK AVAILABILITY

- Software Developer's Kit (SDKs) are available for Independent Software Developers who wish to develop products that interface with the K4000.

APPLICATION REQUIREMENTS

- Windows 98, 2000, ME, or XP

PRODUCT SUPPORT

- A full range of hardware, software, and design services, including advanced sensor control and fingerprint matching algorithms.

AUTHENTEC 'TRUE PRINT'

- A unique, patented imaging technology. During imaging, a small signal is generated between the IC and the finger's live layer. More than 9,000 elements work as an antenna array creating a digital pattern that mimics the fingerprint's underlying structure.
