

Verifi FingerTouch Security

Next Generation FingerPrint Security

The FingerTouch Security systems combines the power of the latest generation FingerPrint Readers with the secure and easy-to-use Verifi ID Manager Software. Used by leading Corporations today Verifi ID Manager offers peace-of-mind security along with all the conveniences you deserve.

Designed for flexibility and scalability, Verifi ID Manager is suitable for everyone from power users to those interested primarily in the convenience of an easy-to-use Password Manager (SSO) or simple one-touch Windows logon. Some of the Advanced features include: Remote Access Manager, Support for Smart Cards & Tokens, File & Package Encryption, Identity Backup, and more ...

Stop the endless typing and forgetting of passwords and use the **convenience with security** today!

KEY FEATURES

- Secure Windows Logon** Personalize your logon method: FingerPrint Only / FingerPrint & Password / FingerPrint or Password. (Tokens also available for logon authentication).
- Password Manager (SSO)** When using the internet for online banking, email, or other secure sites, a simple finger touch will gain you access. There is no more need to remember endless usernames, IDs, pin#s, and passwords!
- e-Wallet** Stop wasting time filling in billing and shipping information when shopping online. Use e-Wallet to store your credit card numbers, address, and all the other information you need, in a safe, secure and accessible form.
- Secure Disk** An innovative and unique approach to File Encryption, Secure Disk becomes a mountable, secure partition of your Hard Drive. Easy to setup and use, each user benefits from protected storage only available upon your Logon. Your finger is your key!
- Application Secure** Prevent unauthorized access to any application. Whether its your check-book, organizer, or web browser - you can restrict access to any program.
